NOVA Consultants, Inc. is a full service engineering, environmental, and energy services company.

NOVA's engineering, procurement, permitting, and construction management projects include solar ground mount, roof mount, and canopy structures; with interconnections from 240V single phase to 13.8kV, three phase.

NOVA is proud that their project management and commissioning processes has been recognized for their Team effort to deliver reliable solar arrays safely, on schedule, and on budget

NOVA has executed over 26 solar PV projects from 3.5kW to 2MW Costing \$20,000 to \$2.6 million per project.

Energy Services

- Energy Audits
- HVAC air balance and optimization
- Steam use optimization
- Energy efficient lighting
- Steam generation
- Utility rate negotiations
- Alternate energy systems
- Solar water heating
- Solar photovoltaic
- Solar Thermal
- Geothermal systems
- Federal and State incentives eligibility

Solar Solutions

- Solar Feasibilities Studies
- Solar Power System Design
- Shade Analysis
- Permit, HOA and Utilities Approvals
- Solar Rebates and Tax Credit Assistance
- Complete Turnkey Engineering and Installation
- Final Inspection and Startup
