

Adding a Solar Electric/Photovoltaic System (PV) to your home or business is an exciting and practical way to:

- Combat increasing energy costs.
- Take control of your future energy bills.
- Earn investment dollars, with higher returns than stocks and other investments.
- Reduce carbon emissions.

The Solar Specialist is a division of Mechanical Energy Systems offering expert quality design and installation on solar electric systems for your home or business. [Take a peek](#) at some of latest solar technology we've installed. Our team of solar specialists provide Solar Consultations to give you their expert advice on how to size a Solar Electric System to best suit your lifestyle. And for the handy solar enthusiast we also carry **do-it-yourself kits** for [Solar Pool Heating](#), [Solar Attic Fans](#) and [Solatube tubular skylights](#). With over 30 years of experience in solar you can count on **The Solar Specialist** to help you plug into the sun and save!

*To install solar hot water systems as a DIY kit is possible but often will void the manufacturers' warranty.

**Solar electric (PV) systems require input from multiple professionals, electricians, engineers and designers plus many components are warrantied only for installations by certified manufacturer approved installers.

Specializing in Solar products made in the U.S.A

8.1 kW Electric System
Ann Arbor, MI
